O3 8. An impetuous ferocity, rether than dijeipline, enabled the Turks originally to effablif themfelves on the ruins of the Eighern empire. That quility, we fee, has not forfaken them. Though inferior to the united frength of the two Imperial Courts, they have, notwithfanding, fince the commencement of the evolution of the commencement of hospitalities, showed the spirit of their ancestors, and proved, that driving them out of Europe is not jo easily to be done as they imagined.—The last bites of a dying wild beaft are said to be the most of a dying wild beaft are said to

Teleph the Little is now convinced that a contell with the Purks is no puerile object. He may coulde himself in exhibiting more military magnificence in times of peace; but when the rough founds of the trumpet arouse to war, his glory is totally celipsed, and the billiancy and actuency of his mind are lost in the vain parade and moch achievements of a numeric for a numer lost in the vain parade and mock atchievments of a pupper-show. We have of his marches and countermarches; but when his troops come to the real scene of action, they are stripped by their unstrained appoints of the laurels with which they had the presumption to adorn their brows, and to appear wonderfully formidable to the enemy. The accient Germans were samed in the field of Mars; but their timil descends different the actions of their ancessors. This melanchesy attention cannot arise from a degeneracy of the species, the sirvent actions and the process of the same actions. This melancholy atteration cannot arife-from a degeneracy of the species, the survey of the prejent race being as well invigorated as those of former periods. To what are we then to attribute it? To that want of vigour and decision as parent in the so-reign. Happy for us, say the enemy, is this gentle and lutho-warm disposition of losserul. - The Turks would fooser sight ar army of lons commanded by a goat, Tilan an army of goats commanded by a lon. army of goats commanded by a lion.

Extract of a letter from Barcelona,

but more certainly for the purpole of attempting a revolution. The officers of the army in Finland, independent of their fovereign, lent a deputation to the Empress of Ruffia, making propolaisfor a truce in that quarter, until they foal have concerted majures for fubjugating their King, or for reducing him to the necessity of abandoning the war, which they allege wastrossity and inquisity commenced on his part. They declare that the King, by his late magliness has broken the compass between jovereign and jubjest, and therefore they hold it their duty to concert mensures for the and julyell, and therefore they hold it their duty to leonest medjures for the jafety of the flate. When the King of Sweden heard of the dijaffellion of his troops in Finland, and the proposition of his afficers to the Empre's for a cejtation of hollilities, his Majelly fainted away, and was with difficulty arouged to a jeyje of his alarming fituation. Thus circumflanced there is no doubt

of the Empress's acquiefcence, nor of her endeavours to soun the slame of discord. She has already communicated her terms of pacification with Sweden, the tenor of which is, to grant a general annelly for, what is past; only on condition, how-ever that the Swedish government shall of what is pall; only one condition, how-ever that the Swediß government shall accede to the general confederacy who has has so long been forming between France, Spain, Germany, Russia and

Denmark.

On the 27th of September, at three o'cleek, Blanchard ajcended at Berlin, attached to his balloon, in the prejence of his Majefly, the royal family, and many of the foreign princes.
